

# Test & Quality Management for Oracle Projects

SQS is the right partner to successfully realise Oracle benefits, e.g. in the Retail industry

## “Quality with Quality” delivered by SQS

SQS’ Oracle Practice has focused on increasing capabilities globally to support many Oracle solutions, e.g. Oracle EBS (E-Business Suite) and Oracle Retail which includes modules like Oracle Retail Merchandising Systems, Oracle Retail Price Management System, Order Management, Purchasing, Product Data Hub, Customer Data Hub, OBIEE (Oracle Business Intelligence Enterprise Edition), SCM (Supply Chain Management), WM (Warehouse Management), Fusion Interfaces, Manufacturing, Utilities and Inventory Management. Additionally, we support other industry-specific solutions, e.g. for Utilities, Automotive, Pharma etc.

Our consultants are ISTQB® certified or have domain experience in one or more modules. These strengths make SQS stand out as an expert in its field with scalable onsite (client location), near-shore and offshore test centres, turning plans into effective and complete solutions.

## Deep industry expertise

SQS is one of the most successful solution providers for Oracle Retail. The solution enables retailers to better manage, control and perform crucial day-to-day merchandising activities from new product introduction to automated replenishment to financial inventory valuation.

Retailing is the final important step in the value chain of providing goods/services to end customers. It distinguishes itself from other industries by way of complexity and enormity of its operations, vendors and customers. Oracle Retail provides retailers a complete, open and integrated suite of business applications, server and storage solutions engineered to work together to optimise every aspect of retail business.

### SQS’ expertise for the Retail industry includes:

- RPM – Price Mgmt.
- RTM – Trade Mgmt.
- ReIM – Invoice Matching
- EBS – E-Business Suite
- WMS – Warehouse Mgmt.
- ODS – Oracle Directory Services
- RIB – Retail Integration Bus
- SOA – Integration
- OSB – Oracle Service Bus
- BI Publisher

## Take advantage of SQS' reusable assets

Additionally, SQS has developed a vast repository of reusable assets based on our real-world test experience. These can be used to accelerate a client's Oracle testing. The repository contains a broad spectrum of pre-defined end-to-end business scenarios including demand to procure to pay, order to cash, maintenance of product master, campaign management etc. These scenarios also have many sub-scenarios, recognising the variety of business processes that an organisation may follow.

### Key benefits of reusable assets:

- Turnaround time effectively reduced
- Reduced risks
- Assured quality and wider test coverage
- Easy customisation as per client's requirements from a vast SQS assets repository
- Reduced cost
- Improvements in test strategy and faster Oracle solutions

## Our Oracle expertise at a glance

### Testing tools:

SQS offers expert consulting for all standard test tools within the Oracle environment, e.g. HP QC, QTP, OATS (Oracle Application Testing Suite), Loadrunner and SQS-TEST®/Professional.

### Oracle solutions tested:

- Performance testing
- QA for BBP
- Risk analysis
- Key end-to-end business
- Health Check services
- Automated testing
- Test management
- Impact analysis
- Acceptance testing
- ... and many more

## Your benefits with SQS

- Identify and ensure near zero errors in risk areas
- Extensive testing experience ensures quality
- Analysis, consultancy, design, build and execution of testing from a single source
- Effective and efficient test management
- 30+ years of testing experience from 7,000+ successful projects
- Over 250+ Oracle consultants
- Knowledge asset management and re-usable accelerators
- Technical capabilities and state of the art testing tools

### All these benefits at no additional cost, leading to savings on current project execution costs.

Using an independent, pure play test specialist like SQS is the most efficient way of securing benefits such as:

- The system integrator and testing specialist being able to work on the same objectives with no hidden agenda
- An independent view on the overall quality management
- An insurance policy on the quality of the final result

We are making bold claims about how to simplify, automate and continually improve the management of Oracle Testing as we have smart consultants with:

- Testing expertise
- Industry experience
- Domain experience
- Innovative techniques
- Tool expertise

In any situation and for any requirement SQS can always help you test effectively and efficiently.

### Put us to the test, we are happy to prove it.
